# iPack Series 50

Integrated Automated Pipe Packaging Solution  
For Pipe Diameter 19mm to 50mm

## Salient Features

- A. Fatigue inducing manual operations are eliminated.
- B. Functional scalability offers accuracy and consistency in packaging.
- C. System components:
  - 1. System for Weighing + Sorting
    - a. Real time pipe weighing and data logging thereof.
    - b. Segregation of pipes based on product specific weight standards ensuring pipes with specified weight are discharged in the accumulator.
  - 2. System for Counting + Bundling + Transfer for Strapping
    - a. Proprietary compact design of accumulator for bundling.
    - b. Robust bundle transfer arrangement to position the bundle for strapping.
  - 3. System for strapping
    - a. Accurate positioning of straps offering reliable and consistent package quality and possibility of varying strap tension.
  - 4. Bagging
    - a. Automated system for insertion of strapped and bundled package into protective bag.
    - b. Bagging material to be made available in "Roll Form".
    - c. Sealing of bag
      - i. Manual side stitching for laminated woven cloth.
      - ii. Hot sealing system can be separately integrated for LDPE film or HDPE film.
